Issuing frequent unnecessary Traditional Notices by Deptt. Of Trade Tax Govt. of U.P (2b/6595,14 Feb. 07)

Field Officer are frequently sending Notices to our Members for explaining the cause of fall in their turnover of sales. This disrupts the business activity, despite the fact that an endorsement is being made on their "Returns" Explaining the fall. The deptt through media & market remains aware of the Market trend e.g. depressions & Rise and no apparent reason can be perceived in this futile exercise. The Small & Medium Enterprises face a host of problems every day & have to manage the venture sail smoothly, whereas such notice hinder their smooth going. Sometimes, surprisingly cause of Rise in Turnover is also enquired, which is very-very embarrassing It is quite clear that most of the transactions are "import" related i.e. "Taxation point " is either "M" or "I" which are regulated by form 31, which may be totaled to estimate the extent of sales. We mean that the Deptt should also create its sources to collect such information & its "Research Cell" may be sensitized to gather such informations.

At the most periodical Returns should have such prescribed columns & business community if makes an endorsement in the periodical Returns to explain the fall in the Turnover of sales that should suffice. But the entrepreneur should not be oft & on disturbed by such notices in the interest & back-ground of development of the State. We hope that this bona-fide rationale will have befitting audience and necessary orders may please be issued.
